All mines, quarries and petroleum sites are required to develop and implement a health control plan.

To assist mines with this, the Resources Regulator will be delivering workshops across NSW. ‘Develop and implement a health control plan’ workshop is targeting sites that are yet to develop and or implement their health control plan.

Sites that have already implemented a health control plan or who are looking to bring their health management plan in-line with current legislative requirements, may find the ‘Evaluate and review a health control plan’ workshop of assistance.

The workshop is best suited to those who have responsibility for the implementation of the Health Control Plan.

Please register your interest in attending, including the location and number of attendees, at stacie.kendall@planning.nsw.gov.au.

### Develop and Implement a Health Control Plan
